

# Clean Air Mississippi Project

The U.S. Environmental Protection Agency has awarded grants to both the Mississippi Band of Choctaw Indians Office of Environmental Protection (MBCI OEP) and the Mississippi Department of Environmental Quality (MDEQ) for improving air quality through plan development. Together we have named this initiative the [Clean Air Mississippi Project \(CAMP\)](#).

*in partnership with the  
Mississippi Department of Environmental Quality*

MBCI OEP is seeking your ideas for reducing greenhouse gas emissions and other air pollutants. Your input will directly benefit tribal lands as well as the entire state!  
To submit your ideas, scan the QR code and take a short survey.

*Scan me for quick access to the survey!*

If you prefer, visit [cleanairmsproject.com](http://cleanairmsproject.com).

**All tribe members who complete the survey by March 1, 2024, will be eligible for a drawing giveaway.**

The greenhouse gas reduction measures identified as priorities will be proposed for incorporation into the Priority Climate Action Plan, which is due to the US Environmental Protection Agency (EPA) on March 1, 2024. The priority measures are being developed as part of the CAMP and identify main sources of Mississippi's air pollution and potential reduction measures. You are invited to give input on the measures before they are incorporated into the final Priority Climate Actin Plan.

Through CAMP we will prioritize emission reduction ideas and prepare our tribe and state to apply for clean air project implementation funding. Let us hear your ideas for improving air quality!
